	DTP ON CALL NOTE
12 Aug 99	(S) Under-sight was called in around 2200 hrs to eval new 2200
	(I) from Germany i reported suicidal attempts. (I) was seen and reported that he is happy to be here all feels same etc
	(I) reports that he has been seen on all off since 94 for p problems, however no hx of SI/HI prior to 94. (I) reports that at present he does not feel any SI/HI, however reports wie he has tried to commit suicide that he can not remember the event and just wakes up in the hospital. (I) reports that he has attempted suicide at least 3 times, however does not really wish to kill him self due to leaving his mother and the shame it would bring to his family, however (I) reports that w/o the meds he can not control himself and the times he has tried to kill himself was due to being off his meds. In addition, (I) suffers from extreme handshakes all has about 12 different types of med that he amount to the DG
	(I) (I) was alert and responsive, good eye contact, better words from all same hand slip marks vertical/horizontal all across the wrist in which appeared to be within the last 2 weeks. (I) appeared nervous, thought process was linear and on stable
	(I) (I) appears to be seeking attention and would like to address past issues, seems intent in being seen regularly otherwise SI/HI, ends drug, sleeping meds reported not working as expected, R/O suicidal features. (I) seems to manipulate and grandiose and untrustworthy of trying suicidal threat
